PROJECTS

TWITTER FAKE NEWS NETWORK - An exploration of Twitter's Verified users and how likely is it that an article shared by the user is fake. Used **Graph Convolutional Networks** to train a model to learn graph embeddings and classify users based on their network neighbours and previous tweets.

CRICKET MATCH PREDICTOR - Use Apache Spark to predict the outcome of a cricket match ball by ball. A probability model, and a decision tree model was trained using **Apache Spark's MLLib** module in **Pyspark**.

YOUTUBE TRENDING VIDEO PREDICTOR - Given a video this model predicts whether the video will feature on YouTubes trending page or not. Trained a Stacking classifier with KNN, Random Forest and Naïve Bayes with Logistic Regression as the meta-classifier using **scikit-learn**.

CONTAINER ORCHESTRATOR - A container orchestration system that implements load balancing, auto scaling and fault tolerance, that can be used with any containerised application. Made with **Node.js** and **Docker**

SENTIMENT BASED STOCK PRICE PREDICTION - Trained various models in **scikit-learn** and **Keras** to classify daily tweets and news articles about Apple as positive or negative. Each day was given a sentiment score based on the overall sentiment. Using this stock price + sentiment score data a LSTM was trained to predict future stock prices.
